

Cambridge Solar Access Campaign

HOW IT WORKS

Green Cambridge and Resonant Energy are working together to expand solar access to multi-family buildings and renters.

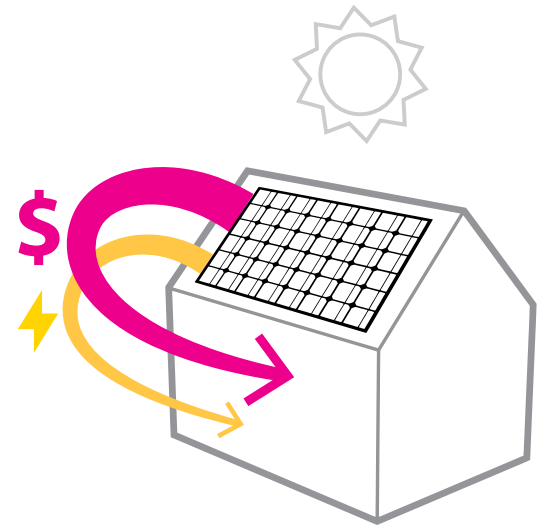

Resonant Energy provides solar installations at no-cost, with no monthly payments, and immediate savings of 10–30%. You owe nothing before or after installation, and there is a flexible credit requirement. Whereas other solar companies require high credit, money down, or long term purchasing agreements with monthly payments, Resonant Energy asks for only a rooftop lease, and gives you a portion of the array's electricity for free.

Green Cambridge is working with Resonant Energy to bring this program to Cambridge through community outreach, including upcoming educational events and door to door canvassing by volunteers.

EXPRESS INTEREST AND RECEIVE A FREE ROOF ASSESSMENT
